Re: Authorization for Individuals to Perform Non-Routine Portable Nuclear Gauge  
Maintenance as a Condition of CPN International (CPN) NRC License No. 04-  
29117-01.

Jim:

I am writing to confirm that CPN servicemen are authorized to perform extended, non-routine maintenance on every make and model of portable nuclear density, moisture, and asphalt content testing gauge. They are qualified by the training and experience listed in the section Training Employees, of the CPN Radiation Control Plan (RCP), dated February 15, 2008. Records of training and a Letter of Authorization to use radioactive materials are retained on file.

These individuals will follow procedures that meet the criteria specified in NUREG 1556, Volume 1, "Consolidated Guidance About Materials Licenses, *Program Specific Guidance About Portable Gauge Licenses*", Appendix G, Information Needed to Support Applicant's Request to Perform Non-Routine Maintenance. These individuals will follow procedures consistent with the gauge manufacturers' service manuals and their Sealed Source and Device Registries, Limitations and Other Considerations of Use, at all times.

Sincerely,

Douglas Carter  
Radiation Safety Officer
