Re: *EnergySolutions*' import license application

I would like to express my support for *EnergySolutions*' import application. I believe *EnergySolutions* through this application, is providing a safe, secure and permanent solution to material that otherwise would be in temporary storage requiring ongoing high levels of dilligence to ensure it is maintained in a secure safe environment. In my opinion it is much beeter to allow a fully qualified and licensed entity to disposition this material once and for all.

EnergySolutions operates in an environmentally safe manner. The Tennessee Division of Radiological Health has reviewed *EnergySolutions*' application and determined the scope of work meets current Tennessee licenses. According to the state of Tennessee, no technical reason exists to prohibit the processing of waste under this licensing application.

The company's exceptional record demonstrates a high level of attention to safety and environmental protection, and its commitment to meeting every applicable Commission, Department of Transportation, and state requirement.

I strongly urge the Commission to approve the permit request.

Thank you for your consideration.
