U.S. Nuclear Regulatory Commission  
Washington DC 20555  
Attn: Rulemaking and Adjudications

Docket No. 11005711

Re: EnergySolutions' import license application

DOCKETED  
USNRC

March 17, 2008 (9:11am)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

I would like to express my support for EnergySolutions' import application.

I believe that nuclear power will play a vital role in the provision of clean, reliable sources of energy in the future and it is imperative that the United States retain control over radioactive materials that may fall into the hands of our enemies.

Based on my research, it is clear that EnergySolutions has an excellent record in the management of low level nuclear waste.

EnergySolutions operates in an environmentally safe manner. The Tennessee Division of Radiological Health has reviewed EnergySolutions' application and determined the scope of work meets current Tennessee licenses. According to the state of Tennessee, no technical reason exists to prohibit the processing of waste under this licensing application.

The company's exceptional record demonstrates a high level of attention to safety and environmental protection, and its commitment to meeting every applicable Commission, Department of Transportation, and state requirement.

I strongly urge the Commission to approve the permit request.

Thank you for your consideration.

James Low
