OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

To whom it may concern.

I, Angie Sanchez, am protesting the crazy idea you so called intelligent people have in bringing the low-level radioactive waste from Ital. Also setting a dangerous precedent of disposing of European waste in the United States. Yes, I'm worried that Utah could become the world's radioactive waste dump.

There is nothing to gain for any of the regular or poor residents of Tooele. The people that will profit and get their pockets lined with good are the big shots in this country. And of course the government leaders.

Which is going to do more harm to our country? The radioactive waste they are sending or the poor Mexican illegals? Yes, I am of Mexican descent. But my people have been here in the U.S. for generations. All my grand + great great grand parents have ever done is come to the U.S. and make a better living for their families. We have worked so hard at the menial jobs the U.S. gov. will give. God forbid that the white man hurt his hands or his back.

I love this country and I want it to be equal to all the different races and all my future grand children + their children. Think about it. We all start as pure innocent children and given a chance, we can all unite and make a fair and equal country for all the different races that make up this beautiful country.

Sincerely,

Angie Sanchez
