Re: Radioactive waste
To: Secretary, US Nuclear Regulatory Commission
Washington D.C. 20555-0001
Attention: Rule Making and Adjudication Staff

March 17, 2008 (3:30pm)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Date: March 9, 2008

Dear Secretary:

We have made our home in Utah for over 30 years and we are very concerned about your sending radioactive waste here to be stored. Many of our friends and neighbors have been down winders suffering especially thyroid and other cancers. We are needing open honest and responsive governing people who have our survival, and well being at heart. Our water supply is limited. To have radioactivity over our aquifer could be disastrous for all life in this state. Our economy depends on tourism and natural beauty. To turn Utah into the world's radioactive waste dump is unconscionable.

Please do not allow Energy Solutions to put their corporate profits above the well being of the people of Utah. Without your decency and respect for us we are at the mercy of becoming contaminated with radioactive dangers yet again. Let other countries solve their own radioactive waste problems. Please Keep Utah Clean and Safe.

Sincerely,

David and Sue Click
