Dear Sirs,

As residents of Utah, Susan and I express our strong objections to allowing the import of low-level radioactive waste from Italy or any other country. The current proposal includes about 1,600 tons of radioactive material. To allow this would set a dangerous precedent that could escalate, and turn Utah into a dumping ground for radioactive waste. No matter what safeguards are in place, the risk for harm to Utah citizens is too high. We encourage you to reject this proposal.

Sincerely yours,

Robert and Susan Crapo
