U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

March 17, 2008 (3:30pm)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Attn: Rulemaking and Adjudication Staff

Dear Staff,

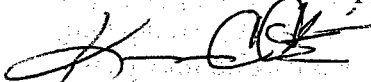

As a concerned citizen of the state of Utah and more significantly a tax payer living on the West bench of Salt Lake due East of Tooele, it definitely concerns myself and my family that Energy Solutions, Inc. could focus on nothing but increasing their profit margins by risking the lives and wellbeing of the families, Businesses and Gods creatures that reside in and around Tooele County.

The threat of even a small accident involved in the every day handling of such a dangerous material definitely out way any amount of profit that will be made by Energy Solutions , this would effect so many . The loss of real properties, the loss of lives would extend well beyond both Tooele County and Salt Lake County. With prevailing winds from the west the State of Colorado, the State of Wyoming and Nebraska and so on could and would be effected by such an event. I honestly feel the profit from handling 1,600 tons of ITALY's nuclear waste would not compensate the people of not only Utah but all the surrounding states that would be effected by Energy Solutions' decision to pursue such an irresponsible act.

The people of this great State should be put first in the decision to accept Nuclear Waste from not only foreign countries but also the Nuclear Waste from within the United States. This state has some of the most breath taking scenery in all of these United States. It would be a shame to turn this state into a vast waste land , depriving our children and future generations from ever being able to see what nature has created for all generations to see even the Italians . Maybe they should come to see for themselves how beautiful it is before they allow this venture to ever take place. The continent of Europe is very large in land mass area which makes me wonder why they need to send their waste anywhere, they produced the waste they should be able to store the waste in their own country.

There is a lot more that can be said about this topic and I hope that other citizens of Utah voice their opposition to Energy Solutions and the import of any waste from any country to the State of Utah.

Please do not let this happen,

Kevin C. Cote
