

DOCKETED
USNRC

March 17, 2008 (3:30pm)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

It is important to the citizens of the State of Utah, that the Regulatory Commission make the right decision, as to the dumping of foreign nuclear waste in this great state of Utah.

There is only one right and proper decision to make and that is to immediately deny the dumping of this waste in Utah. If a foreign country wants to enrich uranium for any use, nuclear power or bomb making, that country should be capable of disposing of this waste on their own turf. Otherwise they have no right to burden other countries with their own mistakes.

Please do what is right for the citizens of Utah and the United States of America and deny the dumping from Italy or any other country that cannot handle their own waste. Energy Solutions has no right to subject any location in America to this hazardous waste.
