Subject: Italian Waste Disposal in Utah/US

Dear Sir/Madam:

I am writing in strong opposition to the proposal to allow Italian Waste to be disposed of in Utah/US. This is unacceptable. We need to focus of cleaning up what we are doing domestically, and not add insult to injury by having open doors for any and all waste to be dumped on us! This is outrageous. Does anyone care about the people of Utah and the burden that those for generations could feel from this type of policy? It is concerning on many levels that this would be allowed when we can't even handle the mess we make here.

Subject: Italian Waste

To whom it may concern:

I am a Utah resident with children and a growing family. I am disgusted with our nations choice to import and store Italian Nuclear Waste in the soil of my state. How can anyone allow this foul violation of home. I live here in Utah. You don't. Don't you dare bury the unheathly and polluted waste of any county in my backyard. What? You think it is safe for the general population because it is not "active" or perhaps if it is buried deep enough? How do you know? Or do you even care enough to consider it possibly causing my 2 children bleeding ulcers or brain damage? I know, I know...it isn't like air pollution or water pollution, where one can trace the effects back to the source. Like hell it isn't! Matter doesn't disappear, it just changes form, or haven't you read your physics books? I am outraged by the proposal that we accept or receive money in exchange for the waste of Italians or anyone else. Why do the innocent children of those who created this nuclear mess have to pay the price for its disposal after the government discovered it was poison? Get that stuff and all the other garbage out of our backyards.
