

DOCKET NO. 11005711

March 9, 2008

DOCKETED
USNRC

March 17, 2008 (3:30pm)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Secretary, U.S Nuclear Regulatory Commission
Washington D.C.
To Whom It May Concern:

I am, as a resident of the state of Utah and a citizen of the United States, deeply concerned about both my state and my nation becoming a dumping grounds for international nuclear waste. To allow Energy Solutions, Inc. to go forward with this endeavor by granting them a license will set a precedent that foreshadows a dark future for us and future generations of Americans.

733

We have not successfully dealt with our own waste and to even consider accepting that of another nation is ludicrous. Europe needs to work toward a reasonable solution rather than using US as a dumping ground.
