March 18, 2008

U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555-0001

Dear Sir / Madam:

Subject: VIRGIL C. SUMMER NUCLEAR STATION (VCSNS)
DOCKET NO. 50/395
OPERATING LICENSE NO. NPF-12
IDENTIFICATION OF COMMITMENT IN SUPPLEMENTAL RESPONSE TO
NRC GENERIC LETTER 2004-02: POTENTIAL IMPACT OF DEBRIS
BLOCKAGE ON EMERGENCY RECIRCULATION DURING DESIGN BASIS
ACCIDENTS AT PRESSURIZED-WATER REACTORS

Reference: J. B. Archie to Document Control Desk, Supplemental Response to NRC
Generic Letter 2004-02 dated February 29, 2008, RC-08-0031

The referenced document provided South Carolina Electric & Gas Company's (SCE&G's) supplemental response to Generic Letter (GL) 2004-02 on February 29, 2008. The statement in the referenced letter that there were no regulatory commitments did not reflect the intention of SCE&G to apply for Alternate Source Term (AST), as stated on page 75 of the attached response.

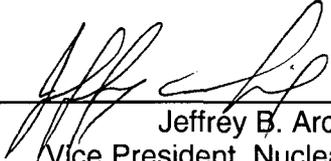

In Section 3p of the attachment to the February 29, 2008 submittal, SCE&G stated its intention to submit an application for AST. SCE&G has determined that the projected licensing submittal for AST should have been identified as a regulatory commitment in the referenced letter. Therefore, SCE&G is submitting this letter to identify one regulatory commitment due to GL 2004-02 response. There are no changes associated with the attachment to the February 29, 2008 response to GL 2004-02.

Should you have questions, please call Mr. Bruce Thompson at (803) 931-5042.

I certify under penalty of perjury that the foregoing is true and correct.
