

March 20, 2008 (4:11pm)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

March 14, 2008

To whom it may concern:

It never ceases to amaze me that nuclear waste is too dangerous to keep where it was produced, but not dangerous to ship elsewhere.

Utah does not need any more waste of any kind, we have the Tooele Army Depot which has burned nerve gas, mustard gas and who knows what else.

This is my home. I am a 4<sup>th</sup> generation Utahn and would like to live here in peace and good health without the worry of an "accident."

Please do not let nuclear waste from any other country come into the United States.

And while you are at it get rid of Enviro-Care here in Utah.

Sincerely,  
Marge Sowby
