**Subject: Final Status Survey Final Report for Survey Unit SU-11**

Dear Sir:

Nuclear Fuel Services, Inc. (NFS) hereby submits the Final Status Survey (FSS) Final Report for a survey unit located at the North Site. This FSS was conducted in accordance with methods specified in References 2 and 3. The radiological survey data demonstrates that the site meets the DCGLs established. Concentrations of residual radioactivity were found to be essentially indistinguishable from background. While NFS does not intend to request a partial site release of this area at this time, we request confirmation that this survey unit will be suitable for unrestricted release in accordance with Title 10, Code of Federal Regulations (CFR), Part 20, Subpart E. Since this area is related to re-establishment of a security zone, NFS requests confirmation from the NRC within 60 days.
