Re: EnergySolutions Export License Application, Federal Register Notice 73 FR  
7764-7765

I am strongly opposed to approval of this license application allowing  
EnergySolutions to import into the United States radioactively contaminated  
material from nuclear facility operations in Italy.

The United States, and in particular, the state of Utah, are currently  
overburdened with storing nuclear waste. To approve a license to  
EnergySolutions to import nuclear waste from any foreign country is putting the  
lives of US citizens and the already compromised environment of the area at risk.

I encourage you to disapprove EnergySolutions application.

Sincerely,

  
Judy C. Ousley
