OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Subject: EnergySolutions' license application to import Italian waste.

AttentionIT, Inc., a Knoxville-based, Veteran-Owned Information Technology firm, has been a long-time business partner with EnergySolutions. We have been consulting at the EnergySolutions Bear Creek facility in Oak Ridge, Tennessee, since 1996, and have assisted EnergySolutions in remaining on the leading edge of information technology. I am writing this letter to express my strong support of the import license application currently under review by the NRC to import Italian waste. EnergySolutions has safely and compliantly processed foreign waste at the Bear Creek Facility for over 12 years, and is currently processing material from Canada that is very similar to the material that would be processed from Italy.

We live in one world, and any nuclear waste or material not processed, handled or disposed of safely and compliantly can affect us all. EnergySolutions has an enormous track record for the safe and compliant handling of waste materials, meeting pertinent license requirements, conforming to all state and federal regulations, and maintaining an absolute commitment to environmental protection. It is my firm belief and conviction that if the Nuclear Regulatory Commission grants this Import License application, EnergySolutions will continue to meet their extremely high standards for safety, compliance and protection of the environment.

I strongly recommend that the Nuclear Regulatory Commission approve the import license request.

Sincerely,

Mark Orren
President/CEO
AttentionIT, Inc.
