OFFICE OF SECRETARY  
 RULEMAKINGS AND  
 ADJUDICATIONS STAFF

EnergySolutions  
 Docket No. 11057

Subject: EnergySolutions' license application to import Italian waste.

As an employee working at the EnergySolutions Clive Utah disposal facility for over 8 years, I am writing in strong support of the import license application. We have safely disposed of low-level radioactive waste for over 17 years.

The amount of waste that will actually be disposed at our Clive facility after waste processing in Tennessee will have a negligible impact on the overall disposal capacity. The waste coming for disposal from Italy will amount to far less than one percent of Clive's annual disposal volume. This amounts to less than 8 railcars per year (Clive receives over 1600 railcar equivalents per year). Clive currently has over 150 million cubic feet of disposal capacity remaining in it's licensed disposal area, which is more than enough to take all the domestic Class A low-level radioactive waste commercially generated.

EnergySolutions' has a stellar safety and compliance record. I have no doubt in my mind that if the Commission grants the license application, EnergySolutions will continue meeting its high safety standards.

I strongly urge the Commission to approve the permit request.

Sincerely,

*Theron Taylor*
