Materials License No. SNM-2511, Docket No. 72-26
Diablo Canyon Independent Spent Fuel Storage Installation
Changes to Technical Specification Bases and 10 CFR 72.48 Report of Changes,
Tests, and Experiments for the Period of March 1, 2006, through February 29, 2008

Dear Commissioners and Staff:

By letter dated March 22, 2004, the Nuclear Regulatory Commission issued Materials License No. SNM-2511 authorizing Pacific Gas and Electric Company (PG&E) to receive, possess, store, and transfer spent fuel and associated radioactive materials resulting from the operation of Diablo Canyon Power Plant in the Diablo Canyon Independent Spent Fuel Storage Installation (ISFSI).

Diablo Canyon ISFSI Technical Specification (TS) 5.1.1, "Technical Specifications (TS) Bases Control Program," provides a means for processing changes to the Bases of the TS. TS 5.1.1b states that changes to the TS Bases may be made without prior NRC approval in accordance with the criteria in 10 CFR 72.48. Further, TS 5.1.1d requires that changes to the TS Bases implemented without prior NRC approval shall be provided to the NRC on a frequency consistent with 10 CFR 72.48 (d)(2). No changes have been made to the TS Bases during the period from March 1, 2006, through February 29, 2008.

Pursuant to 10 CFR 72.48, "Changes, Tests, and Experiments," PG&E performed no required 10 CFR 72.48 evaluations for the period of March 1, 2006, through February 29, 2008. 10 CFR 72.48(d)(2) states that each licensee shall submit a report containing a brief description of any changes, tests, and experiments, including a summary of the evaluation of each. This report shall be submitted at intervals not to exceed 24 months.

If you have any questions regarding this submittal, please contact Mr. Terence Grebel at (805) 545-4160.
