Re: Amendment request for the closure and decommissioning of one licensed site at Dale Rd, Avon, CT

Dear Sir or Miss:

We have closed our Avon Dale Road office which provided nuclear medical imaging services. The sealed sources were removed and transferred to the main office site of 85 Seymour Street, Hartford, CT. Wastes were allowed to decay for greater than 10 half-lives and then removed as normal or biomedical trash, as appropriate.

The last day for the receipt of radioactive material and patient imaging was Feb. 7, 2008. The area and contamination surveys were performed on February 14. The following data summarizes the final surveys for ambient radiation (mR/hr) levels using a Bicron GM survey meter, and, the removable contamination counted in a Ludlum Model 2200 NaI probe system in selected areas of the closed office. The background radiation survey ranged from 0.02-0.03 mR/hr, and as expected, no contamination was found on site.

Area	mR/hr	Wipe Test
Imaging room	0.02	≤200 dpm
Patient table	0.02	≤200 dpm
Flooring, desk tops	0.02	≤200 dpm
Hot Lab & counter tops (including waste storage spaces)	0.02	≤200 dpm
Hot Lab Flooring	0.02	≤200 dpm
Office Areas:		
Reception	0.02	≤200 dpm
Waiting room	0.02	≤200 dpm
Hallway	0.02	≤200 dpm
