Subject: RE: Removal of soil from Whittaker Section 2 'Pit'

I think they will only need to run it for a couple of days. I am still waiting on some of the specifics from Pat.

I have another inspection scheduled for next week. I'll talk with my boss when she gets in and see what she wants me to do. Do you think they may still be running the filtration system at the end of the week (say, Thursday / Friday)?

The letter came in and is being processed. I'll be able to get a copy this AM to review it. Thanks for turning that around so quickly.

What about next week? Pat told me last nigh that the system will be ready on Monday. I am going to try to get a request to PA DEP today.

Did you get the letter?

Kevin:

I may not be able to get out there the week of the 26th. In know you guys are still working out the approvals and don't have a firm timeframe

A/137

yet, but when you have a better idea of this, could you give me a feel for how long the activity is expected to take? If it looks like it may either last until or slip to the next week, I may be able to come then. Please just keep me posted (I know you already said you would).

Thanks,
Marjorie

Thanks, Kevin:

I will try to arrange to be there on Tuesday 6/27, assuming the process will require more than 1 day. Please keep me posted so that I can move that out if the PADEP review takes longer or anything else pushes it out.

We got the OK from AIG today to go forward with the filtration. Now I need to get the system specs and get them to the PA DEP. I hope to get this out tomorrow. It will take at least a week for approval from PA DEP and a couple more days for construction/installation of the system. I would estimate that Monday 6/26 (?) we will be ready to go.

Kevin:

Two Items:

1) Can you please let me know when you expect to perform the filtration activities at Whittaker? I would like to come out to see the process, and also to see the material at Greenville Metals.

2) Do you have an ETA on the letter we discussed last week?

Thank you,

Marjorie
