Subject: Whittaker Site Waste Shipment Schedule

Initial shipments of the LLRW slag from the Whittaker site are scheduled to begin Tuesday 9/6. At this time we have received all necessary documents, including the "Notice to Transport" from Envirocare.

Arrangements have been made with MHF Logistics, Alaron Corp and two trucking companies contracted by MHF, McCutcheon Enterprises and Buffalo Fuel. The trucking companies will be transporting the the material to Alaron for transloading to gondola railcars. Trucks leaving the Whittaker site will be end dump tractor trailers with lined beds and deployed roll-top covers. Their maximum material load will be 21.5 tons.

The schedule calls for the Alaron transload facility to receive 40 truckloads per week and ship eight railcars per week to Envirocare. This is planned to continue through mid-October. The material is being shipped as DOT exempt and will not be placarded. While it does not fall under the DOT definition as radiological waste or hazardous waste each load will be manifested to provide the documentation requirements of NRC 10 CFR 61.66.

Please let me know if you have any questions regarding the shipping schedule.

Thanks,
Rich Moss
