NR/GK/450/343 /2007

To whom it may concern

The Institute of Atomic Energy agrees to accept, from Ideal Source Int. as waste (to be disposed of with other radioactive waste generated at the Maria Reactor) topaz stone fragments and topaz gemstones, discarded as waste due to damage that renders them unsalable. The shipment of topaz waste has to be done in accordance with the Directive 92/3/EURATOM and accompanied with appropriate Standard Document for Monitoring Radioactive Waste Shipment (Type B – Import into the Community).

This agreement will remain in force as long as the Maria Reactor is employed as an irradiation facility for Ideal Source Int. and the facilities of Maria Reactor are used to determine the levels of radioactivity in the gemstones, in preparation for their U.S. release as exempt material.

Deputy Director of IAE
Grzegorz Krzysztozek
