NUCLEAR REGULATORY COMMISSION
REGION IV
611 RYAN PLAZA DRIVE, SUITE 400
ARLINGTON, TEXAS 76011-4005

March 31, 2008

Schlumberger Technology Corporation
ATTN: Raymond N. Dickes
Radiation Safety Officer
200 Gillingham Lane
Sugar Land, Texas 77478

SUBJECT: LICENSE RENEWAL

Please find enclosed Amendment No. 88 to NRC License No. 42-00090-03. **This license amendment authorizes your NRC license renewal. Please review this license carefully to ensure that it correctly reflects the activities and materials authorized under your license. If there are any questions or clarifications, please let me know as soon as possible.**

The NRC and the State of Pennsylvania have signed an agreement in which the NRC relinquished its regulatory authority for certain licenses of byproduct, source, and special nuclear material, and in turn the State of Pennsylvania assumes such regulatory authority. This agreement becomes effective March 31, 2008. Therefore, I have also issued a corrected copy to the modified license which was provided to the State of Pennsylvania. In this manner, the State of Pennsylvania has the latest commitments and authorizations made by Schlumberger Technology Corporation under your NRC license.

Your financial assurance cost estimate was reviewed as part of your license renewal. The level of financial assurance required for your NRC License No. 42-00090-03 is \$75,000.00. Your existing Trust Agreement Schedule demonstrates sufficient financial assurance to meet the cost estimate for your licensed activities.

NRC's Regulatory Issue Summary (RIS) 2005-31, provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through NRC's electronic document repository (ADAMS). The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/>. Pursuant to NRC's RIS 2005-31, the enclosed materials license will not be made publicly available.

Please note that the enclosed license will have the marking "Official Use Only - Security-Related Information". You are encouraged to limit distribution of this license to those individuals with a need to know and to protect your license from public disclosure.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14)(xi). You should review this license carefully and be sure that you understand all conditions. Please contact me at 817-276-6552 if you have any questions.

In addition, please note that NRC Form 313 requires the applicant, by signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant. Since the NRC also accepts a letter requesting amendment of an NRC license, the signatory for such a request should also be the licensee or certifying official rather than a consultant.

NRC will periodically inspect your radiation safety program. Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available on the following internet address: <http://www.nrc.gov/reading-rm/doc-collections/enforcement/>.

The NRC no longer publishes the NRC Rules and Regulations loose leaf supplements. However, an electronic version of the NRC's regulations is available on the NRC Web site at www.nrc.gov. Additional information regarding use of radioactive materials may be obtained on the NRC Web site at <http://www.nrc.gov/materials/miau/mat-toolkits.html>. This site also provides the link to the toolbox for updated information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>. Pursuant to NRC's Regulatory Issue Summary 2005-31, the enclosed materials license will not be made publicly available.

Thank you for your cooperation.

Sincerely,

Rachel S. Browder, Health Physicist
Nuclear Materials Safety Branch B
