**Subject:** EnergySolutions' license application to import Italian waste

Date: 3/27/2008

DOCKETED  
USNRC

Office of Secretary  
U.S. Nuclear Regulatory Commission  
Washington DC 20555  
Attn: Rulemaking and Adjudications

March 31, 2008 (8:46am)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

EnergySolutions  
Docket No. 11057

Subject: EnergySolutions' license application to import Italian waste.

As an employee working at the EnergySolutions Clive Utah disposal facility for over 10 years, I strongly support the import license application. We have safely disposed of low-level radioactive waste for over 17 years.

The amount of waste that will actually be disposed at our Clive facility after waste processing in Tennessee will have a negligible impact on the overall disposal capacity. The waste coming for disposal from Italy will amount to far less than one percent of Clive's annual disposal volume. This amounts to less than 8 railcars per year (Clive receives over 1600 railcar equivalents per year). Clive currently has over 150 million cubic feet of disposal capacity remaining in its' licensed disposal area, which is more than enough to take all the domestic Class A low-level radioactive waste commercially generated.

During the time that I have worked here EnergySolutions has maintained a very high standard in both safety and compliance. When the Commission grants the license application I personally am confident that EnergySolutions will continue to comply with all regulatory requirements and will strive to maintain the highest safety record possible.

I strongly urge the Commission to approve the permit request.

Sincerely,

**MICHAEL B. TURLEY**
