This plan of importation of radioactive waste from Italy is not a coherent solution to an age old problem. What benefit will it be to bring all this waste here? The only benefit to anyone will be to Italy as they will have eliminated a major disposal issue for their own country. The United States needs to start looking at clean alternatives such as Solar, wind, Hydro power, and focus less attention on energy sources such as Coal and Nuclear since the hazardous waste from radioactive material has a half life of 1000 years. Coal and Nuclear are both contaminating influences in our society that have taken over due to lobbyists for these industries getting a stronghold in government circles by pandering to our Politicians. It will not stop with Italy, as we all know only too well other countries will want us to "Take Care Of" their radioactive waste as well. This is NOT acceptable. We have enough issues here in this country now with people being stretched to the limit by paying \$345.00 and more per gallon of gasoline. Conservation, and clean energy alternatives are what most Americans want and at this point we all need.

Check into the above mentioned alternatives before it too late for our children and grandchildren.

Sincerely
Carol Stark, Director
