OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Ref: *EnergySolutions* – Docket Number: 110057

Dear Sir or Madam:

Control Solutions Group, L.L.C. (CSG), is a woman-owned small consulting firm providing Project Controls and Estimating support for a number of clients and the principals in the company have been associated with the U.S. commercial nuclear industry for over 25 years. CSG is based in Knoxville, Tennessee and *EnergySolutions* is one of our primary clients. We have been associated with *EnergySolutions* or one of its predecessor companies for almost a decade.

There have been several newspaper articles recently regarding *EnergySolutions*' proposed processing of waste from Italy. We respectfully offer our opinion of both *EnergySolutions* and their waste disposal protocols.

We believe *EnergySolutions* to be an ethical company and a generous participant in the community. Their waste disposal practices are aimed at placing radioactive waste in the safest possible condition. Their "end state" is, in our experience, intended as the least impact to the environment and the lowest probability of exposure to the public. They have a demonstrated track record in handling, packaging, and disposition of radioactive materials and their employees have a safe conduct paradigm that supports ecological stewardship. We support their efforts.

Thank you for this opportunity to present our opinion.

Sincerely,

A handwritten signature in black ink that reads "Michael B. Carson". The signature is fluid and cursive, with a long horizontal stroke at the end.

Michael B. Carson, EVP
Principal
Control Solutions Group, L.L.C.
