Docket No. 11005711

Re: *EnergySolutions*' import license application

I would like to express my support for *EnergySolutions*' import application. As an employee working for *EnergySolutions* I can tell you first-hand that the company plays a vital role in helping cleanup legacy waste in Tennessee. *EnergySolutions* has transported and disposed of hundreds of millions of pounds of Tennessee generated material outside of Tennessee. For more than 25 years, *EnergySolutions* has been the industry leader in waste processing and disposal.

EnergySolutions operates in an environmentally safe manner. The Tennessee Division of Radiological Health has reviewed *EnergySolutions*' application and determined the scope of work meets current Tennessee licenses. According to the state of Tennessee, no technical reason exists to prohibit the processing of waste under this licensing application.

The company's exceptional record demonstrates a high level of attention to safety and environmental protection, and its commitment to meeting every applicable Commission, Department of Transportation, and state requirement.

I strongly urge the Commission to approve the permit request.

Thank you for your consideration.
