Re: USNRC Materials License No. 13-32533-01

Dear Sir/Madam:

This correspondence is sent to your office requesting the authorization to transport radioactive material (either barium-133 containing less than 250 uCi's or cobalt-57 containing less than 8 mCi's) to temporary job sites anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for the regulating the use of licensed material. These sources shall be used as a reference standard for calibration of dose calibrators. An expeditious reply is requested as there is a need to complete out-of-state testing next month (May 2008).

If you have any questions or require additional information, please feel free to contact me by any means available to you at any of the contact information noted below. In the meantime, have a pleasant day.

Sincerely,

Edward E. Wroblewski, M.A.  
Diplomate, ABSNM  
Radiation Safety Officer
