Subject: Clarification on renewal request

(NOTE: This will be used as the Documents Title in ADAMS)

Summary: The licensee has a Cs-137 self-shielded Gammator 50B Irradiator and licensed for CHIPS material. The licensee requested to place the irradiator in a storage only mode. However, the irradiator has been out of service since September 2006. I explained to the licensee they can place the irradiator on a possession only status if they had no intentions of repairing the irradiator and had intentions of discarding it. I also explained the difference between a possession only and storage only license status. Dr. McKee said she would discuss these options with the committee members.

I also indicated that for the license renewal of the CHIPS material they could follow the guidance in NUREG 1556 Vol. 7. I explained that a renewal is similar to a new license in that they need to commit to certain policies and procedures. I further explained that if they had intentions of using the irradiator they could follow the guidance in NUREG 1556 Vol 5.

Action Required: Place in ADAMS under MC142045
