Re: Amendment to License #13-15399-02

To Whom It May Concern:

We request amendment to our materials license # 13-15399-02 to add Daniel R. Emig, M.D. as an authorized physician user on our license for all materials listed on our license. Dr. Emig's American Board of Radiology certificate is attached, showing "AU Eligible" status.

At the same time, in accordance with NRC Regulatory Issue Summary 2007-22, we request amendment to include the accelerator produced materials that will now be considered byproduct materials under the new guidelines. We request that gallium-67, thallium-201, iodine-123 and indium-111 radiopharmaceuticals be included. Also we possess Co-57 sealed sources as calibration and reference sources. These are less than the 10 CFR 35.65 limit of 30 millicuries. We do not use PET radiopharmaceuticals at this hospital.

Please contact us if additional information is required.

Thank you.

Sincerely,

Michael Meadows, CEO
