RE: Request for Materials License, Mail Control Number 316929.

Dear Mrs. Simmons,

Here are the changes I would like to make based on our conversation on 3/24/08.

Total Activity: We designed our storage facility for six gauges and would like our license to accommodate six gauges. Currently we only plan on using 4 gauges but would like the option to add two additional gauges if needed. I added Californium-252 to the radioactive material list since some Troxler gauges have this source type and I wanted the option to purchase those if needed. The total activity for Californium-252 would not exceed 66 μ Ci or 1 gauge.

Operating Procedures: We will follow Appendix H of NUREG – 1556, Vol. 1, Rev. 1.

Organization Chart: See attached page.

Sincerely,
PASEO CORRIDOR CONSTRUCTORS
