Nation Representative  
Oneida Indian Nation  
5218 Patrick Road  
Verona, NY 13478

SUBJECT: REQUEST FOR SCOPING COMMENTS CONCERNING THE THREE MILE  
ISLAND NUCLEAR STATION, UNIT 1, LICENSE RENEWAL APPLICATION  
REVIEW

Dear Representative Halbritter:

The U.S. Nuclear Regulatory Commission (NRC or the staff) has recently received an application from AmerGen Energy Company, LLC (AmerGen), for the renewal of the operating license for the Three Mile Island Nuclear Station, Unit 1 (TMI-1), located on Three Mile Island, which is situated in the Susquehanna River, in Londonderry Township of Dauphin County, Pennsylvania. The NRC is in the initial stages of developing a Supplemental Environmental Impact Statement to the Generic Environmental Impact Statement (GEIS), which will document the impacts associated with the renewal of TMI-1. We would like your assistance in our review by providing input to the NRC's environmental review scoping process. The NRC's process includes an opportunity for public and inter-governmental participation in the environmental review. We want to ensure that you are aware of our efforts pursuant to Title 10 of the *Code of Federal Regulations* Part 51, Section 51.28(b). In addition, as outlined in 36 CFR 800.8(c), the NRC plans to coordinate compliance with Section 106 of the National Historic Preservation Act of 1966 through the requirements of the National Environmental Policy Act of 1969.

The NRC has also sent copies of this letter to the tribal contacts for the following Federally-recognized tribes: Absentee-Shawnee Tribe of Oklahoma; Cayuga Nation; Delaware Nation; Delaware Trust Board; Eastern Shawnee Tribe of Oklahoma; Oneida Indian Nation; Oneida Nation of Wisconsin; Onondaga Nation; Seneca Nation of Indians; Seneca-Cayuga Tribe of Oklahoma; St. Regis Mohawk Tribe; Shawnee Tribe; Stockbridge-Munsee Band of the Mohican Nation of Wisconsin; Tonawanda Seneca Nation; and Tuscarora Nation.

Under NRC regulations, the original operating license for a nuclear power plant is issued for up to 40 years. The license may be renewed for up to an additional 20 years if NRC requirements are met. The current operating license for TMI-1 will expire in April 2014. The proposed action would include the use and continued maintenance of existing plant facilities and transmission lines. For the purpose of license renewal, AmerGen plans to replace the TMI-1 steam generators, and estimates that the total area disturbed by construction, decontamination, and laydown activities would be less than 10 acres, all of which would be previously disturbed property within the bounds of the TMI-1 flood protection dike. Provided for your information is the TMI-1 site boundary map (Enclosure 1) and transmission system map (Enclosure 2).

The GEIS considered the environmental impacts of renewing nuclear power plant operating licenses for a 20-year period on all currently operating sites. In the GEIS the NRC staff identified 92 environmental issues and developed generic conclusions related to environmental

impacts for 69 of these issues that apply to all plants or to plants with specific design or site characteristics. For the remaining 23 issues, plant-specific analyses will be documented in a supplement to the GEIS. A supplemental environmental impact statement will be prepared for TMI-1 to document the staff's review of environmental impacts related to terrestrial ecology, aquatic ecology, hydrology, cultural resources, and socioeconomic issues (among others), and will contain a recommendation regarding the environmental acceptability of the license renewal action.

Please submit any comments that you may have to offer on the scope of the environmental review by May 30, 2008. Written comments should be submitted by mail to the Chief, Rules and Directives Branch, Division of Administrative Services, Mail Stop T-6D59, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Electronic comments may be submitted to the NRC by e-mail at [ThreeMileIslandEIS@nrc.gov](mailto:ThreeMileIslandEIS@nrc.gov). At the conclusion of the scoping process, the NRC staff will prepare a summary of the significant issues identified and the conclusions reached, and mail a copy to you.

To accommodate interested members of the public, the NRC will hold two public scoping meetings for the TMI-1 license renewal supplement to the GEIS on May 1, 2008. The first session will be held in the afternoon and an identical session will be held later that evening. The afternoon session will be held at the Elks Movie Theatre, 4 West Emaus Street, Middletown, PA 17057. The evening session will be held at Londonderry Elementary School, 260 Schoolhouse Road, Middletown, PA 17057. The first meeting will convene at 1:30 p.m. and will continue until 4:30 p.m., as necessary. The second meeting will convene at 7:00 p.m. and will continue until 10:00 p.m., as necessary. Additionally, the NRC staff will host informal discussions one hour before the start of each session.

The TMI-1 license renewal application and the GEIS are available on the internet at [www.nrc.gov/reactors/operating/licensing/renewal/applications/three-mile-island.html](http://www.nrc.gov/reactors/operating/licensing/renewal/applications/three-mile-island.html). In addition, the following locations have agreed to make the license renewal application and the GEIS available for public inspection: Londonderry Township Municipal Building, 783 South Geyers Church Road, Middletown, PA 17057; Middletown Public Library, 20 North Catherine Street, Middletown, PA 17057; and Penn State Harrisburg Library, 351 Olmsted Drive, Middletown, PA 17057.

The staff expects to publish the draft supplemental environmental impact statement in December 2008. A copy of the document will be sent to you for your review and comment. The NRC will hold another set of public meetings in the site vicinity to solicit comments on the draft supplemental environmental impact statement. After consideration of public comments received, the NRC will prepare a final supplemental environmental impact statement, which is scheduled to be issued in July 2009.

If you need additional information regarding the license renewal review process, please contact Ms. Sarah Lopas, License Renewal Project Manager, at 301-415-1147 or at [sl2@nrc.gov](mailto:sl2@nrc.gov).

We want to ensure that you are aware of our efforts pursuant to Title 10 of the *Code of Federal Regulations* Part 51, Section 51.28(b). In addition, as outlined in 36 CFR 800.8(c), the NRC plans to coordinate compliance with Section 106 of the National Historic Preservation Act of 1966 through the requirements of the National Environmental Policy Act of 1969.

The NRC has also sent copies of this letter to the tribal contacts for the following Federally-recognized tribes: Absentee-Shawnee Tribe of Oklahoma; Cayuga Nation; Delaware Nation; Delaware Trust Board; Eastern Shawnee Tribe of Oklahoma; Oneida Indian Nation; Oneida Nation of Wisconsin; Onondaga Nation; Seneca Nation of Indians; Seneca-Cayuga Tribe of Oklahoma; St. Regis Mohawk Tribe; Shawnee Tribe; Stockbridge-Munsee Band of the Mohican Nation of Wisconsin; Tonawanda Seneca Nation; and Tuscarora Nation.

Under NRC regulations, the original operating license for a nuclear power plant is issued for up to 40 years. The license may be renewed for up to an additional 20 years if NRC requirements are met. The current operating license for TMI-1 will expire in April 2014. The proposed action would include the use and continued maintenance of existing plant facilities and transmission lines. For the purpose of license renewal, AmerGen plans to replace the TMI-1 steam generators, and estimates that the total area disturbed by construction, decontamination, and laydown activities would be less than 10 acres, all of which would be previously disturbed property within the bounds of the TMI-1 flood protection dike. Provided for your information is the TMI-1 site boundary map (Enclosure 1) and transmission system map (Enclosure 2).

The GEIS considered the environmental impacts of renewing nuclear power plant operating licenses for a 20-year period on all currently operating sites. In the GEIS the NRC staff identified 92 environmental issues and developed generic conclusions related to environmental

REVIEW

Dear President Holton:

The U.S. Nuclear Regulatory Commission (NRC or the staff) has recently received an application from AmerGen Energy Company, LLC (AmerGen), for the renewal of the operating license for the Three Mile Island Nuclear Station, Unit 1 (TMI-1), located on Three Mile Island, which is situated in the Susquehanna River, in Londonderry Township of Dauphin County, Pennsylvania. The NRC is in the initial stages of developing a Supplemental Environmental Impact Statement to the Generic Environmental Impact Statement (GEIS), which will document the impacts associated with the renewal of TMI-1. We would like your assistance in our review by providing input to the NRC's environmental review scoping process. The NRC's process includes an opportunity for public and inter-governmental participation in the environmental review. We want to ensure that you are aware of our efforts pursuant to Title 10 of the *Code of Federal Regulations* Part 51, Section 51.28(b). In addition, as outlined in 36 CFR 800.8(c), the NRC plans to coordinate compliance with Section 106 of the National Historic Preservation Act of 1966 through the requirements of the National Environmental Policy Act of 1969.

The NRC has also sent copies of this letter to the tribal contacts for the following Federally-recognized tribes: Absentee-Shawnee Tribe of Oklahoma; Cayuga Nation; Delaware Nation; Delaware Trust Board; Eastern Shawnee Tribe of Oklahoma; Oneida Indian Nation; Oneida Nation of Wisconsin; Onondaga Nation; Seneca Nation of Indians; Seneca-Cayuga Tribe of Oklahoma; St. Regis Mohawk Tribe; Shawnee Tribe; Stockbridge-Munsee Band of the Mohican Nation of Wisconsin; Tonawanda Seneca Nation; and Tuscarora Nation.

Under NRC regulations, the original operating license for a nuclear power plant is issued for up to 40 years. The license may be renewed for up to an additional 20 years if NRC requirements are met.
