Re: Notification of New Area of Use, NRC License Number 24-32139-01

Dear Toye:

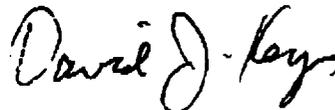

We wish to add the following areas of use in order to allow greater flexibility in OR scheduling:

Operating rooms 9 through 12. See Attachment A.

Previously, operating rooms 1 through 8 were identified as areas of use. All OR rooms will be considered as controlled areas on days of use in which Nuclear Medicine procedures are performed in that room. On those days of use, after the room has been area surveyed and wipe tested, the room may be released, thus becoming an uncontrolled area. All rooms adjacent to a room undergoing a nuclear medicine procedure shall be considered as an uncontrolled area.

If you have any questions concerning this request, please contact Dr. Keys at 314-525-4064 (office), 314-424-3398 (pager), or by email at [dkeys@med-phys.com](mailto:dkeys@med-phys.com).

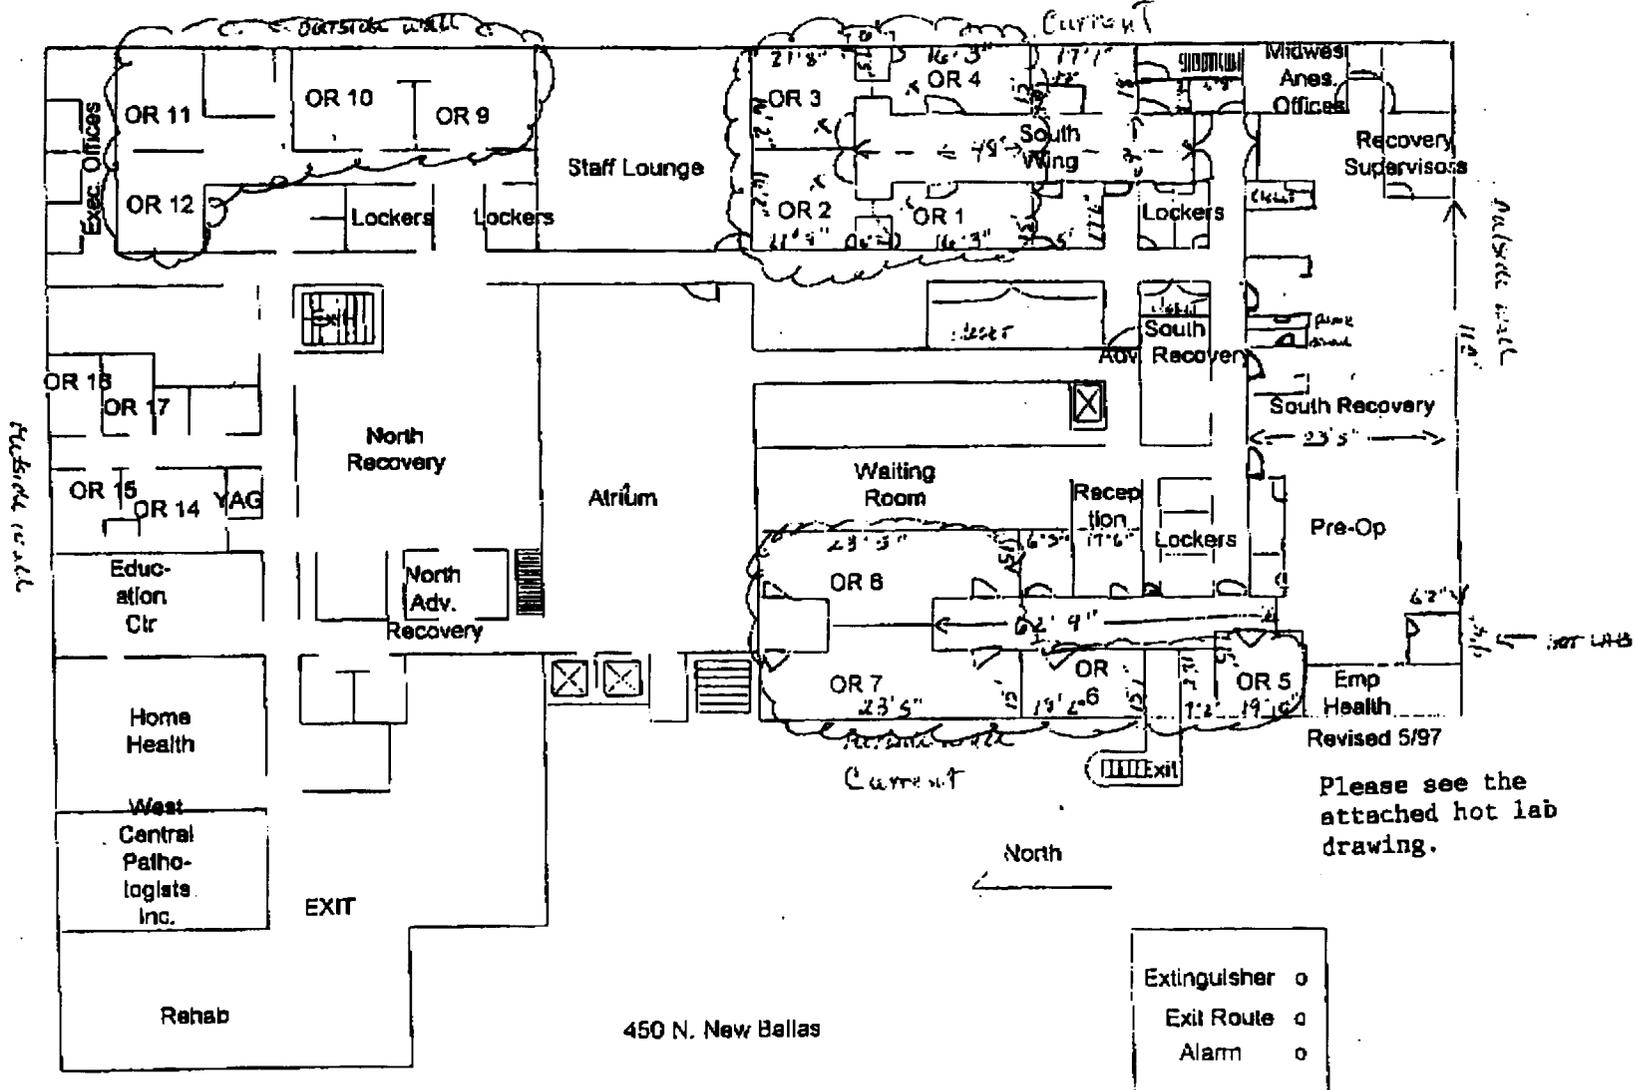

Sincerely,

David J. Keys, PhD  
Radiation Safety Officer
