

DOCKET NO. 11005711

April 1, 2008

1025

To:

Secretary, U.S. Nuclear Regulatory Commission

DOCKETED
USNRC

Attn: Rulemaking and Adjudication Staff

April 8, 2008 (9:35am)

Washington D.C. 20555-0001

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear Sir,

As a long-time resident of Utah, I would like to add my voice to that of Kent Bradford, chairman of the Utah Radiation Control Board as well as many other concerned citizens in and around Utah, in opposing allowing EnergySolutions, Inc. to transport low-level or any other level waste for that matter from Italy or elsewhere to Utah to be disposed of here. Count me among the numerous citizens of Utah who do not want Utah to become the world's dumping ground for nuclear waste.

As has already been pointed out, any country that has the technological capability of producing nuclear power within its borders should find its own solution to disposing of its toxic waste and not seek to dispose of it by engaging unscrupulous, profit-driven organizations to do its dirty work at the expense of those who are powerless to prevent it.

Sincerely,

Cristina Goodwin
