OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Secretary
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

Attn: Rulemaking and Adjudication Staff

To Whom It May Concern:

We ask that you do not approve Energy Solutions Inc.'s proposal to import low-level radioactive waste to Utah from Italy's dismantled nuclear power industry.

Because most weather systems cross Utah from west to east, Salt Lake City is downwind from Energy Solutions' dump in Toole County. For this reason, we already have grave misgivings about the safety of importing anyone's nuclear waste. We find it appalling that Energy Solutions wants to import waste from Italy and likely turn Utah into Europe's nuclear waste dump. We want our two young sons to grow up in a healthy, clean environment in a state that they can be proud of.

Asking the state of Utah and its residents to deal with America's low-level nuclear waste is enough. Please, don't allow Energy Solutions to go forward with their proposal.

Sincerely,

Heather Whidden
