EnergySolutions
Docket No. 11057

DOCKETED
USNRC

April 10, 2008 (3:25pm)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Subject: EnergySolutions' license application to import Italian waste.

I have been employed in various capacities at the EnergySolutions Clive Utah disposal facility for over 12 years. I am writing in strong support of the import license application. We have safely disposed of low-level radioactive waste since 1988.

The amount of waste that will actually be disposed at our Clive facility after waste processing in Tennessee will have a negligible impact on the overall disposal capacity of our facility and will help provide work for the ~200 full-time employees. Clive currently has over 150 million cubic feet of disposal capacity remaining in it's licensed disposal area, which is more than enough to take all the domestic Class A low-level radioactive waste commercially generated.

EnergySolutions' has a stellar safety and compliance record. I have no doubt in my mind that if the Commission grants the license application, EnergySolutions will continue meeting its high safety standards.

I strongly urge the Commission to approve the permit request.

Sincerely,
Jeffrey Gardner
Vice President, Clive Facility
