Re: EnergySolutions Import License Application IW023

Gentlemen:

My husband and I were appalled to learn that consideration is being given to bringing nuclear waste products from foreign countries to Tennessee for processing and then transporting them to Utah for burial. This should not be! Let each country treat and dispose of their own nuclear waste products. The United States is not the garbage dump of the world.

We urge you to oppose EnergySolutions Import License Application IW023 for disposal of nuclear waste products from other countries. We have enough of our own nuclear waste and should not be the dumping ground of the world.

Sincerely yours,

LaVerne J. Evans
