Subject: ADDITIONAL COLORADO PROGRAM CHANGES

Monica,

In response to your comments today and per our discussions, we will change item 2 on page 2 of our proposed correspondence (to be sent to licensees) to read as follows:

2. By _____, 2008 [90 days] the licensee shall establish and maintain a fingerprinting program that meets the requirements of the correspondence and enclosures dated _____ and Annex A of the license for all individuals who have unescorted access to radioactive materials in Quantities of Concern.

Additionally, we will modify the condition in our licenses to also clearly reference the enclosures to our letter (transmitting the amended license) to read as follows:
A. The licensee shall complete implementation of additional Increased Control requirements outlined in the Department correspondence and enclosures dated _____, 2008, not later than _____, 2008 [180 d].

Please contact me should you have additional comments or questions.
Thanks.
