Docket No. 11005711

Re: *EnergySolutions*' import license application

I would like to express my support for *EnergySolutions*' import application. With more than 25 years of experience in environmental restorations and disposition, *EnergySolutions* is the industry leader in waste disposal.

Operating with an exceptional record for safety, *EnergySolutions* not only operates with a distinct concern for public safety, but also sensitivity to environmental safety. The company continues to meet every applicable Commission, Department of Transportation and state requirement for the safe handling and transportation of nuclear materials.

I strongly urge the Commission to approve the license application. *EnergySolutions* has proven that it is a responsible company that performs at the highest level in the industry.

Thank you for your consideration.

Sincerely,

Billy Porter
