OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

EnergySolutions  
Docket No. 11057

Subject: EnergySolutions' license application to import Italian Waste.

Dear Commission Members:

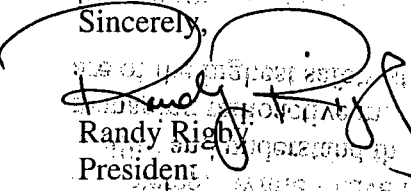

The recent attention EnergySolutions has received regarding its request for a license to import radioactive material from Italy for processing and disposal at EnergySolutions facilities in Tennessee and Utah has generated a lot of discussion. I appreciate the criteria that must be adhered to with such important issues that involve international commerce and appreciate the efforts of the NRC to manage these requests.

After careful consideration and study of the criteria by which a license can be issued I have learned that these decisions are based on the health and safety of the work to be completed. While I have not been to the Tennessee facility I have toured the Clive, Utah facility and understand the safety standards by which EnergySolutions adheres to in managing radioactive material. I am confident that the policies and procedures at Clive are of the highest safety standards and are also applied company-wide.

We are fortunate to have a U.S. company like EnergySolutions to manage this material in a safe and compliant manner. It is by this safety standard that I support the NRC in granting EnergySolutions the importation license to properly managing this project.

Again, thank you for your consideration and the thorough process the NRC follows before granting such requests.

Sincerely,

  
Randy Rigby  
President  
Utah Jazz
