NRC TO DISCUSS 2007 PERFORMANCE ASSESSMENT FOR RIVER BEND STATION

The Nuclear Regulatory Commission staff will meet in St. Francisville, La., on April 29, with representatives of Entergy Operations, Inc., to discuss the agency's assessment of safety performance for last year at the River Bend Station.

The meeting, which will be open to the public, is scheduled to begin at 6 p.m. at the River Bend Station Training Center Auditorium, 5485 U.S. Hwy. 61N in St. Francisville.

In addition to the performance assessment, the NRC staff will be available to answer questions from the public on the safety performance of River Bend Station, as well as the NRC's role in ensuring safe plant operation.

"The NRC continually reviews the performance of River Bend Station and the nation's other commercial nuclear power facilities," NRC Region IV Administrator Elmo E. Collins said. "This meeting will provide an opportunity for a discussion of our annual assessment of safety performance with the company and with local officials and residents who live near the plant."

A letter sent from the NRC Region IV office to plant officials addresses the performance of the plant during 2008 and will serve as the basis for the meeting discussion. It is available on the NRC web site at:

http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/LETTERS/rbs_2007q4.pdf.

The NRC utilizes color-coded inspection findings and performance indicators to assess nuclear power plant performance. The colors start with "green" and then increase to "white," "yellow" or "red," commensurate with the safety significance of the issues involved.

The NRC said River Bend Station operated safely during 2007 and will receive regular, or baseline inspections during 2007. Routine inspections are performed by two NRC Resident Inspectors assigned to the plant and by inspection specialists from the Region IV Office in Arlington, Texas.

Current performance information for River bend Station is available on the NRC web site at: http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/RBS1/rbs1_chart.html .
