Subject: USNRC Docket No. 72-1014, HI-STORM 100, TAC NO. L24085

Reference: [1] Holtec Project 5014  
[2] NRC letter dated February 28, 2008  
[3] Amendment #6 to HI-STORM 100 CoC 1014  
[4] Public Meetings with NRC on March 21, 2008 and March 27, 2008

Dear Sir:

Via letter (Reference 2), the SFST provided a Request for Additional Information (RAI) on our proposed amendment (Reference 3) to the HI-STORM 100 Certificate of Compliance. The letter requested a response by May 2, 2008, and further requested that if Holtec is unable to meet this deadline to notify the NRC in writing of a new submittal date at least two weeks in advance.

Two meetings were held with the SFST staff in March of 2008 (Reference 4) and during these meetings Holtec proposed a plan for addressing certain RAIs. Additional clarification and guidance from the SFST is necessary and a meeting has been scheduled for April 28, 2008 to discuss these topics.

At this time Holtec plans to submit the responses to the RAI on the requested date, barring any information provided to Holtec between now and then as well as during the meeting which may have an effect on our RAI submittal date.

If you have any questions or require additional information, please contact us.

Sincerely,

Dr. Stefan Anton.  
Director, Technical Services and Licensing, Holtec International
