Monica,

The Radioactive Materials Program is still awaiting a response from the Georgia Office of the Attorney General regarding their recommendation on the implementation of the Fingerprinting Requirements on Increased Control Licensees. The request was submitted to the Law Department on December 18, 2007, and during the week of March 31st the Program received some inquiries regarding the request. I anticipate hearing something soon, however, we have not received any feedback as to rather the Program will be authorized to pursue this by means of (a) License Condition, (b) Rule Change, and/or (c) State Law/Legislature Change. Pending this decision, the Program is submitting the fingerprinting requirements licensing conditions for new and existing licensees for your review. This is being sent to give the NRC enough time to review and respond in a timely manner so that the Georgia will be able to meet the implementation time line. Please keep in mind that this is tentative, until we received an approval from the Office of the Attorney General on which legally binding method to use. I'll follow up with NRC immediately upon receipt of a response from them.

Please see the attached proposed license conditions requiring fingerprinting for new and existing licensees.

Thank you for your review and if you need anything further please let me know.

Cynthia Sanders
