**SUSQUEHANNA STEAM ELECTRIC STATION
NRC GENERIC LETTER 2008-01: DOCUMENTATION
OF EXTENSION REQUEST
PLA-6352**

**Docket Nos. 50-387
and 50-388**

Reference: NRC Generic Letter 2008-01, "Managing Gas Accumulation in Emergency Core Cooling, Decay Heat Removal, and Containment Spray Systems," dated January 11, 2008.

Generic Letter 2008-01 (referenced above) requires submittal of a 3-month response if it is not deemed possible to meet the requested 9-month response date. During a teleconference between PPL (R. Sgarro) and NRC (J. Wermeil) on April 8, 2008, PPL requested an extension to the timeline for the 3-month response. The extension was requested based on:

- evolving expectations for the 9-month response;
- necessary engineering resources that are currently heavily involved in refueling outage completion and startup activities associated with extended power uprate; and
- the need for additional time to identify the actions, which will be completed both prior to and after the 9-month response date (October 11, 2008).

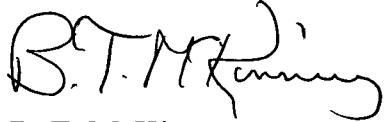

Based on the above Mr. Wermeil granted an extension of the 3-month response until May 30, 2008.

Any questions regarding this letter should be directed to Mr. Duane L. Filchner at (610) 774-7819.
