Monica,

The Nebraska Legislature passed a bill today giving us authority to require fingerprints of licensees. The Governor has 5 days (excluding Sunday) to either sign or veto the legislation. Even if he does nothing, the bill will become law after 5 days because an emergency clause was attached. We do not anticipate a veto.

Attached for your review is our proposed cover letter to the licensees, the license condition and the orders that we will tie down with a license amendment. Your expedited review is requested. We will begin to impose these requirements, as written, on May 30 if we have not received the results of your review by then.

Please confirm that you have received this e-mail.
