DOCKET NO. 11005711

April 8, 2008

DOCKETED
USNRC

Secretary, U.S Nuclear Regulatory Commission

April 21, 2008 (3:30pm)

Washington, D.C. 20555-0001

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

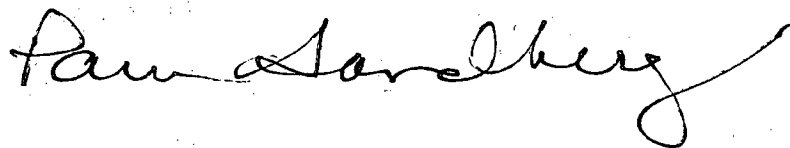

Attn: Rulemaking and Adjudication Staff

Gentlemen:

I am writing because I am concerned that your Commission is considering the approval of importing low-level radioactive waste to the U.S. and being accepted for storage here. I am asking you to stand up for what is right and what is good for this Country and all the people who live here. Please ban the importation of this low-level waste. I live in Utah and we face Energy Solutions bringing in this waste from Italy. I not only object to the Energy Solution disposals, but to any company trying to import any waste from foreign countries. If we let this happen, it will open the door for future importation. We already have a problem of waste disposal in this country and with the current population explosion it is only going to get worse.

You have the power and responsibility to protect the people of the United States. I urge you to do so.

Sincerely,

Pam Sandberg
