ATTN: Rulemakings and Adjudications

DOCKETED
USNRC

April 21, 2008 (3:30pm)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear Members of the Commission:

SUBJECT: Docket No. 11005711 - EnergySolutions' Import License Application

As an informed elected official and citizen of the state of Utah, I support EnergySolutions' import license application submitted to the U.S. Nuclear Regulatory Commission.

EnergySolutions has more than 25 years' experience in environmental restorations, remediation, and waste disposition and is a world leader in the industry. Public and environmental safety are prime concerns for EnergySolutions, and it is proud of its safety and compliance record. The company continues to meet every applicable Commission, Department of Transportation, and State of Utah requirement for the safe handling and transportation of nuclear materials.

I strongly urge the Commission to approve the license application. EnergySolutions has proven itself to be a responsible company, performing at the highest level in the industry.

If you have questions or need further comment, please contact me.

Sincerely yours,

Senator Mike Dmitrich
Senate Minority Leader
