Lynchburg, VA 24506-1646

SUBJECT: REVIEW OF AREVA NP. INC.'S, LYNCHBURG, FACILITY CHANGES AND  
THE INTEGRATED SAFETY ANALYSIS UPDATE FOR CALENDAR YEAR  
2007 (TAC L32668)

Dear Mr. Wertz:

The U.S. Nuclear Regulatory Commission (NRC) staff reviewed the Integrated Safety Analysis Annual (ISA) Update, submitted via letter (ML080560365) and enclosures (ML080560366) dated January 18, 2008.

Our review has determined that all facility changes were appropriately made in accordance with the requirements of Title 10 of the Code of Federal Regulations (CFR) 70.72, and that prior NRC approval of these changes were not required. We have no further questions at this time; however, an inspection may be performed at a future date, in accordance with our inspection schedule.

In future submittals of annual 10 CFR 70.72 internally authorized changes, we recommend that you continue to: (1) indicate if a change was physically made to a structure, system, or component; and (2) indicate the document(s) modified due to the change. This will facilitate a more expedited risk-informed review.

Upon issuance of this letter TAC L32668 will be closed.

If you have any questions regarding this letter, please contact me at (301) 492-3119, or via e-mail to [Matthew.Bartlett@nrc.gov](mailto:Matthew.Bartlett@nrc.gov).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electron Reading Room).

Sincerely,
