Dear Mr. Portzline:

I am responding to the petition for rulemaking dated September 12, 2001, that you submitted to the U.S. Nuclear Regulatory Commission (NRC) on behalf of the Three Mile Island Alert. The petition was docketed as PRM-73-11 and requested that the NRC amend its regulations governing physical protection of plants and materials to require NRC licensees to post at least one armed guard at each entrance to the "owner controlled areas" (OCAs) surrounding all U.S. nuclear power plants.

The notice of receipt of the petition was published in the *Federal Register* (FR) on November 2, 2001, (66 FR 55603). The comment period closed on January 16, 2002. Eleven comment letter(s) were received.

In a letter dated December 27, 2006, we notified you that the NRC would be considering PRM-73-11 during the resolution of public comments for the "Power Reactors Security Requirements," rulemaking published in the FR on October 26, 2006 (71 FR 62664). This rulemaking proposes extensive revisions to the NRC regulations in 10 CFR Parts 50, 72, and 73 that address security requirements for nuclear reactor licensees.

The enclosed FR notice regarding PRM 73-11 is being transmitted to the Office of the Federal Register for publication. The NRC has concluded its evaluation of PRM-73-11 by including it for consideration as part of the proposed rule "Power Reactor Security Requirements." Therefore, PRM-73-11 is considered resolved and closed.

You can monitor further NRC action on the issues raised by the petition on the "Power Reactors Security Requirements," rulemaking at the federal rulemaking portal, <http://www.Regulations.gov>, by searching on rulemaking docket ID: NRC-2006-0016 and docket ID: NRC-2008-0019. The NRC also tracks all rulemaking actions in the "NRC Regulatory Agenda: Semiannual Report (NUREG-0936)."

Sincerely,

/RA/
