

April 25, 2008

Dr. Mohamed ElBaradei  
Director General  
International Atomic Energy Agency  
Wagramer Strasse 5, P.O. Box 100  
A-1010 Vienna  
Austria

Dear Director General ElBaradei,

At the Fourth Review Meeting of Contracting Parties to the Convention on Nuclear Safety, International Atomic Energy Agency (IAEA) Member States and the Secretariat engaged in thoughtful discussion about the importance of nuclear safety. This theme was the central focus of the most recent International Nuclear Regulators Association (INRA) meeting, which took place March 13-15, 2008 in Washington. The INRA members expressed a collective desire to emphasize the necessity of independent nuclear safety regulatory bodies. Members agreed to formulate a statement which would note our strong support for fundamental principles of continuous improvement in nuclear safety and the establishment of independent regulatory structures. It is our hope that, in transmitting our views to the IAEA, the Agency can assist us in conveying this important message to all of its Member States.

As the 2008 Chair of INRA and on behalf of my INRA colleagues, and in support of the Convention on Nuclear Safety, I am pleased to provide the IAEA the INRA Statement. We are grateful for your assistance and for your continued guidance on matters of nuclear safety and security for countries considering nuclear power and for all IAEA Member States.

Sincerely,

*/RA/*

Dale E. Klein
