SUBJECT: PRAIRIE ISLAND NUCLEAR GENERATING PLANT - INFORMATION
REQUEST FOR AN NRC INSPECTION ASSOCIATED WITH CONTAINMENT
SUMP 05000282/2008003; 05000306/2008003

Dear Mr. Wadley:

On May 19, 2008, the NRC will begin an inspection at the Prairie Island Nuclear Generating Plant. One inspector will perform this 1-week inspection in accordance with NRC Temporary Instruction (TI) 2525/166, "Pressurized Water Reactor Containment Sump Blockage." This inspection focuses on commitments made by Prairie Island Nuclear Generating Plant in response to Generic Letter (GL) 2004-02, "Potential Impact of Debris Blockage on Emergency Sump Recirculation at Pressurized Water Reactors (PWRs)."

In order to minimize the inspection impact on the site and to ensure a productive inspection for both parties, we have enclosed a request for documents needed for the inspection. These documents have been divided into two groups. The first group is required prior to the inspection to ensure that the inspector is adequately prepared. This information should be provided to the Regional Office no later than May 9, 2008.

The second group of requested documents contains additional items that the inspector will review, or need access to, during the inspection, and should be available by the first day of the on-site inspection. It is important that all of these documents are up to date and complete in order to minimize the number of additional documents requested during the preparation and/or the on-site portions of the inspection.

M. Wadley

-2-

The inspector for this inspection is Gerard O'Dwyer. If there are any questions about the inspection or the material requested, please contact the inspector at (630) 829-9624 or via e-mail at Gerard.O'Dwyer@nrc.gov.

Sincerely,

/RA/

Ann Marie Stone, Chief
Engineering Branch 2
Division of Reactor Safety

Docket Nos. 50-282, 50-306
License Nos. DPR-42; DPR-60

Enclosure: Information Request For Generic Nuclear Power Plant
w/Temporary Instruction (TI) 2525/166 Inspection

cc w/encl: D. Koehl, Chief Nuclear Officer
Regulatory Affairs Manager
P. Glass, Assistant General Counsel
Nuclear Asset Manager
John Linc Stine, Division Director, Minnesota Department of Health
Tribal Council, Prairie Island Indian Community
Administrator, Goodhue County Courthouse
Commissioner, Minnesota Department
of Commerce
Manager, Environmental Protection Division
Office of the Attorney General of Minnesota

**INFORMATION REQUEST FOR GENERIC NUCLEAR POWER PLANT
TEMPORARY INSTRUCTION (TI) 2525/166 INSPECTION**

Inspection Report: 05000282/2008003; 05000306/2008003(DRS)

Inspection Dates: May 19 – 23, 2008

Inspection Procedures: TI 2525/166, "Pressurized Water Reactor Containment Sump Blockage"

IP 71111.17, "Changes, Tests, or Experiments, and Permanent Plant Modifications" (reference)

Inspector: Gerard O'Dwyer, Reactor Inspector
(630) 829-9624, Gerard.O'Dwyer@nrc.gov.

I. Information Requested for Our In-office Preparation Week

The following information is requested by May 9, 2008, or sooner, to facilitate inspection preparation. If you have any questions regarding this information, please call the inspector as soon as possible. (Please provide the information electronically by email or in "pdf" files, Excel, or other searchable formats, preferably on CDROM. The CDROM should contain descriptive names to facilitate ease of use.)

1. A list of all correspondences to/from the site related to GL 2004-02. This list should include the addressor, address, subject matter, and date of correspondence.
2. A list of modifications, procedure changes, or other commitments made in response to GL 2004-02 as documented in the Item 1 responses. (For the purpose of this inspection, modifications include permanent plant changes, design changes, set point changes, equivalency evaluations, suitability analyses, and commercial grade dedications.)
3. Name(s) and phone numbers for the regulatory and technical contacts.

II. Information Requested to be Available on First Day of Inspection (May 19, 2008)

1. Copies of the modifications and procedure changes made in response to GL 2004-02 or committed to in the documents from Item 1. Modification documents should include a design description, records showing date of completion, and 10 CFR 50.59 applicability determination, screening, or evaluation.

**INFORMATION REQUEST FOR GENERIC NUCLEAR POWER PLANT
TEMPORARY INSTRUCTION (TI) 2525/166 INSPECTION**

2. Please ensure that other supporting documents for the selected items have been located and are readily retrievable as the inspector will likely be requesting these documents during the inspections. Examples of supporting documents are:
 - a. Drawings supporting the modifications;
 - b. Calculations related to the modifications;
 - c. Procedures affected by the modifications; and
 - d. UFSAR change papers generated due to a 10 CFR 50.59 evaluation.
3. List of related calculation changes that have been issued for use.
4. List of any related corrective action documents (open and closed).
5. Copies of procedures addressing the following: modifications, design changes, set point changes, equivalency evaluations or suitability analyses, commercial grade dedications, post-modification testing, 10 CFR 50.59 evaluation and screenings, and UFSAR updates.
6. Copy of the UFSAR change log (or a synopsis of changes). This should include all of the changes made to the UFSAR that were incorporated in the last 10 CFR 50.71(e)(4) submittal and any approved changes to the current UFSAR.

If you have questions regarding the information requested, please contact the lead inspector.
